p. 1-3. (Abstract available)

DESCRIPTORS: *Steam, *Temperature control,
Control systems, Time signals, *Time-lag theory,
*Boilers, Timing devices.

The possibilities of reducing the time lag of the change
of temperature signal for superheated steam were
investigated on a boiler type TP-230-2. Attention was
confined to the basic factors governing the time-lag
of the step change signal: time lag due to the super-
heater itself, time lag due to the detecting element and
